working for us**

NCMA gynecologic robotics program

Minimally invasive laparoscopic surgery

NCMA Women's OB/GYN Center is proud to offer gynecologic robotics services at Memorial Hospital using the minimally invasive approach of the da Vinci® surgical system. This exciting new procedure makes it possible for your surgeon to control your surgery via high-definition 3D views which help translate hand movements into small, precise actions using advanced EndoWrist® instruments.

Gynecologic robotic surgery may be ideal for:

- Hysterectomies
- Heavy menstrual bleeding
- Uterine fibroids or adenomyosis
- Genetic cancer syndromes such as BRCA or Lynch Syndrome
- Endometriosis or chronic pelvic pain
- Ovarian cysts

To learn more please call 707-579-1102.
